

ATSSB Percussion Audition Guidelines

All percussion equipment to be used must be in the audition area before auditions begin. Students may take their sticks and mallets with them to the holding area but must leave equipment in the audition area.

State level chair audition will be held on cuts from the music to be performed in the All-State Band and will be posted online after Area.

ROUND ONE: SNARE DRUM

1. The first 5 students will be allowed in the audition room for a 30-second warmup timed by the Monitor.
2. After the warmup, all but the first performer will exit the room, then auditions begin.
3. If the individual student wishes to warm up, they may play a long roll for no more than five seconds (timed by the monitor), after which they will play the assigned etude.
4. After five students have auditioned, the next five will be allowed in to warm up (see No. 1 above).
5. This continues until all students have performed the first round (snare drum).

ROUND TWO: MALLETS

1. Beginning a third of the way down the audition list, the first 5 students will be allowed in the audition room for a 30-second warmup timed by the Monitor.
2. After the warmup, all but the first performer will exit the room, then auditions begin.
3. If the individual student wishes to warm up, they may play a long roll for no more than five seconds (timed by the monitor), after which they will play the assigned etude.
4. After five students have auditioned, the next five will be allowed in to warm up (see No. 1 above).
5. This continues until all students have performed the second round (mallets).

Mallet recommendations are as follows (*this list should be used as a reference for the type of mallet that should be used for the student's performance*):

- bells - hard rubber mallets such as 06 Mike Balter, gray, or medium plastic mallets.
- marimba - any medium firm yarn wrapped marimba mallet such as Encore 32AY, Innovative 603H or Balter 222.
- xylophone - medium hard rubber mallets such as Encore 1038, Innovative ENS360, or Balter 5.

Students should refrain from using any plastic mallets, brass mallets, or acrylic mallets.

ROUND THREE: TIMPANI

1. Beginning two-thirds of the way down the audition list, the first 5 students will be allowed in the audition room for a 30-second warmup timed by the Monitor.
2. After the warmup, all but the first performer will exit the room, then auditions begin.
3. The Monitor will lower all tuning pedals to the floor.
4. Each student will tune each timpani from any non-electronic source so long as it is audible to the judging panel. Each student will be given 30 seconds to tune the timpani. Timing will be done by the percussion monitor. After the tuning process, they must touch each drum from the lowest pitch to the highest pitch to demonstrate to the judges the resulting pitches before beginning the etude. They may play a long roll on the first note of the etude for no more than five seconds as a warmup, after which they will play the assigned etude. Judges will consider tuning in their adjudication of the etude.
5. After the student is done, the Monitor will lower the pedals to the floor again for the next student.
6. After five students have auditioned, the next five will be allowed in to warm up (see No. 1 above).
7. This continues until all students have performed the third round (timpani).

26 The Sonatina is the largest two-part construction in music. The first section of the form begins with an exposition of a primary theme, moves through a "bridge-like" portion into a secondary theme in a different key, and usually concludes with a kind of coda. The second section recapitulates the opening theme in the original key, often utilizes a transitory passage as a lead-in to the secondary theme, which is, this time, also in the original key; the form may or may not employ an appended, coda-like closing. In this piece, the form has again been translated into rhythmic terms: Section I - primary theme, measures 1-5; transition, measures 6-7; secondary theme, measures 8-19; coda, measures 20-25. Section II - primary theme, measures 26-29; transition, measures 30-36; secondary theme (in original time signature,) measures 37-40; coda, measures 41-43.

Sonatina ♩ = 88 24

The musical score is presented in two systems of staves. The first system consists of a piano part (top two staves) and a double bass part (bottom two staves). The piano part features a primary theme in measures 1-5, a transition in measures 6-7, and a secondary theme in measures 8-19. The double bass part features a primary theme in measures 1-5, a transition in measures 6-7, and a secondary theme in measures 8-19. The second system consists of a piano part (top two staves) and a double bass part (bottom two staves). The piano part features a primary theme in measures 26-29, a transition in measures 30-36, and a secondary theme in measures 37-40. The double bass part features a primary theme in measures 26-29, a transition in measures 30-36, and a secondary theme in measures 37-40. The score includes various dynamics such as *f*, *ff*, *p*, *mf*, and *cresc.* (crescendo). The piece concludes with a coda marked with a double bar line and a fermata.

BACH'S VIOLIN CONCERTO IN A MINOR

Adapted for xylophone by M. Goldenberg

Allegro moderato

The musical score is written for xylophone and consists of ten staves of music. It begins with a treble clef and a 2/4 time signature. The first staff starts with a bracketed section and a dynamic marking of *f*. The music features a variety of rhythmic patterns, including eighth and sixteenth notes, and rests. Dynamic markings include *f*, *mf*, and *ff*. There are three circled letters A, B, and C marking specific sections of the score. The key signature is one flat (A minor). The score concludes with a large, stylized flourish on the final staff.
